SUMMARY

I'm a web developer specializing in the MERN stack, creating dynamic applications with MongoDB, Express, React, and Node.js. I also work with Python for scripting and backend tasks. I seek a team where I can grow as a developer, build practical projects, and contribute my skills to real-world applications.

SKILLS

- **Web Development:** MERN Stack, React.js, Node.js, Gsap, $_{Framer}$ motion, Tailwind, Bootstrap
- **Programming:** JavaScript, Python Version Control: Git, GitHub
- **Soft Skills:** Problem-Solving, Time Management, Communication, Team Collaboration
